## BSNL Speed Test

Bharat Sanchar Nigam Limited, also called BSNL, is a state-owned and one of the top ISPs in India, providing quality internet services to millions of customers. It provides FTTH, telephone, internet, GPON, and TV services.

We provide BSNL broadband subscribers with the best speed test services.

**BSNL Speed Test Tool** is best when you experience frequent drops and lags while using the internet. It takes only a second to measure the internet speed, enabling you to identify the cause of your slow connection.

When you run our speed test tool, it provides you with an accurate measurement of your internet's download speed, upload speed, ping response rate, and jitter level.

In any case, your download and upload speed shouldn't be lower than 1Mbps, if you want a fast internet connection. Plus, if your ping response rate is over 100 ms and the jitter level is higher than 30 ms, then it means that your internet speed is not up to the standard.

Considering these metrics, our BSNL speed test tool helps you to check your internet speed. You just need to access our tool and run it. Just a few seconds, and it will let you know whether your internet speed is slower or faster.

Leverage our BSNL Internet Speed Test Tool to diagnose any weaker internet connection for free. No expert help is required to perform the upload speed test, download speed test, ping speed test, or jitter speed test — since our tool is intuitive enough to easily deliver desired results.
