Talking Head

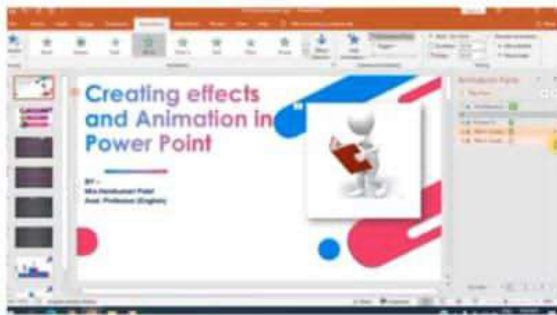

Made with **KINEMASTER**

Benefits of educational videos

- They increase students' engagement
- They support students' retention
- Students spend less time of stress and learning costs
- Applications can assist them according to their own capabilities with their own speed with them

- It records the slides with audio or audio and video both.
- Can be prepared with the help of smartphone or laptop.
- Interesting for students.
- Screen, audio and video can be combined together.

The screenshot shows a video editing application interface. The central video preview window displays a whiteboard with the following handwritten text:

- Pronunciation of 'the'
- the is before consonant sounds
- the is before vowel sounds
- the man
- the usual
- the elephant
- the end

The text "the man" and "the usual" are circled in orange, and "the elephant" and "the end" are boxed in orange. The interface includes a left sidebar with navigation icons, a top right "KINEMASTER" watermark, a right sidebar with editing tools (Media, Layer, Audio, Voice), and a bottom timeline with a "Handwriting" tool button.
